Commander's Intent

In FY2017, ILWG will increase the complexity and breadth of training for air and ground emergency services by developing and qualifying additional personnel to undertake ES tasking and responses in both traditional search and rescue (SAR) and emerging disaster response profiles (natural and man-made). IL Wing is capable of short-duration stand-alone operations with niche roles in Homeland Security and as an augmentation force within the Great Lakes Region (GLR) and nationwide, acting as a force-multiplier. Specific emphasis areas will include:

- * Develop a robust Incident Command staff (IMTs) for sustained operations over five days.
- * Increase and retain the number of mission-ready SAR/DR pilots.
- * Increase and retain the number off mission observers, scanners, and aerial photographers.
- * Increase the number of GIIEP-capable aircrews/operators.
- * For Counterdrug Recruit and Train MP capable personnel who are available during the business week.
- * Provide non-pilot aircrew members training opportunities so as to attain and retain currency in the complex G1000 platform and increase the scope of mission profiles
- * Grow ground capabilities and improve training opportunities with an emphasis in fielding Urban Direction Finding Teams.
- * Meet communications demands from internal and external customers including (but not limited to) base comms, mobile comms, "high-bird" relays, and inter-agency comms.
- * Enhance Group-level and Unit-level proficiency training planning to complement the Wing plan.
- * Enhance training through multi-wing exercise opportunities to increase the ability to operate in large, more-complex, and emerging non-traditional mission profiles. IL Wing will become more proficient in multi-wing exercises and the employment of both fixed and mobile command post operations.
- * Increased inter-agency involvement with SAR/DR/HLS partners throughout IL and the GLR. Agencies will include (but not limited to): local Community Emergency Response Teams (CERT), local emergency management entities (EMAs); county EMAs, IL EMA, IL SAR Council, IL National Guard, US Army Corps of Engineers, and FEMA Region V.

Requirements

The following IL Wing resources are needed in order to achieve the Commander's Intent. The items listed herein establish a Requirements Baseline against which future developmental actions will be measured.

- * To manage an incident response of at least five days, IL Wing needs to field an IMT from the Wing Hq staff and at least one from each Group (six total)
- * To sustain flight operations over five days, we need five (5) qualified aircrews for each ILWG aircraft (10 a/c, as of Jun16). That staffing requirement falls to the units with assigned aircraft.
- * ILWG disaster relief/damage assessment tasking has grown in the past few years. Current and future training will focus on enhanced capability to produce damage assessment products and services to outside agencies.
- * Ground operations requirements call for UDF teams and full ground teams throughout the Wing. The vast territory (in terms of square miles) of IL requires special attention given geographic areas currently under-served by CAP resources, with Groups 1, 3, and 4 covering the greatest area. Every unit will be required to field at least one UDF team (larger units – 2). Every Group will field at least one fully trained and equipped GT (larger groups - 2). These requirements will be based on each Group's percentage of the Wing's overall membership (see Membership Table).
- * Wing HQ Ops/ES staff will work with individual Groups to facilitate training opportunities.
- * The ILWG Director of Communications will determine current and desired levels of communications resources and trained personnel to meet internal and external customer needs.

Goals, Objectives & Tasks

1. Maintain and grow mission capability – CAP must maintain its existing force, and truly increase the number of mission qualified personnel it has in order to answer day to day mission requirements and develop the capacity to sustain operations lasting longer than a few days.

- CAP must maintain and grow our numbers of mission qualified personnel.
 - Regular exercises should be conducted to prepare aircrews, ground teams, and incident staff to support typical missions.
 - Wings should conduct schools at least annually for aircrews, ground teams, and incident staff.
 - Units need to be empowered to conduct training at the lowest level possible in order to feed trainees into the qualification pipeline.
 - Conduct CAPFs 5 & 91 evaluations.
- Qualified personnel must maintain proficiency.
 - Conduct small training missions focused in specific specialty areas so that aircrews, ground teams, and incident staff can remain current and learn from each other.
 - Encourage both funded and unfunded use of pilot proficiency profiles and self-conducted pilot proficiency flight guidelines by pilots with instructors and other crew members where possible.
- Maintain and grow the pool of qualified supervisors, evaluators, instructors, and check pilots to ensure new personnel have leaders and mentors prepared to help them progress through qualification tracks.
 - Conduct National Check Pilot Standardization Courses.
 - Conduct Flight Clinics.
 - Conduct training for all skills evaluators.

2. Integrate with our neighbors – in order to create a seamless operating capability, we must work more closely with our geographic neighbors and implement best practices from across our wings and regions both internally and externally. This will build our CAP capacity, and increase our relevance with customers. We are only value added if we are utilized. We need to build faith and confidence with other members of the response community so they immediately think of us and are comfortable tasking and using us.

- Train Together
 - Personnel near bordering wings or regions should look at opportunities to cross train with their counterparts across the border. Look for flight clinics, schools, and other training where a synergy can be achieved. Offer more than you get.
 - Personnel near bordering wings or regions should work with their counterparts to develop mutual training opportunities. Look for training iterations where outside experts are part of the training.
 - Take advantage of wing and regional training opportunities like wing and region emergency services academies and conferences.
 - Take advantage of national training opportunities at the National Emergency Services Academy (NESA) and the CAP Annual Conference.
 - Take advantage of training provided by customers and counterparts like state emergency management agencies, the Emergency Management Institute, the Center for Domestic Preparedness, International Association for Emergency Management conferences, National Association for Search and Rescue courses and conferences, and FAA clinics.

- Exercise Together
 - Units and personnel near the bordering wing or region should work with their counterparts to develop exercises that cross the geographic boundaries of their neighbors.
 - Units and personnel near a bordering wing or region should work with their counterparts to conduct interoperability training. Encourage staff to work on each other's mission, and aircrews and ground teams to work under another wing or regions staff. Conduct cross border team events. Host their mission resources and work through the administrative hurdles to allow them access to critical systems, communications and mission materials.
 - Participate in the annual communications exercise as well as joint regional and wing exercises to build experience.
 - Encourage regular participation in communications nets by the entire community, not just top personnel.
 - Participate in state emergency management exercises, and invite state emergency management personnel and other agencies to monitor, audit, or participate in CAP exercises and complex training scenarios.
 - Participate in FEMA Region Exercises.
 - Participate in National Level Exercise events in your jurisdictions.

3. Evaluate and inspect to ensure that CAP can meet mission requirements, and provide training to correct deficiencies.

- Each wing will be evaluated to determine if it can meet mission requirements every 2 years.
 - Conduct training to prepare for evaluations regularly, and remedial training when necessary.
 - Conduct evaluated missions in each wing once every two years.
- Subordinate Units Inspections (SUIs) must be conducted for every unit every two years.
 - Accomplish SUIs.
 - Answer SUI discrepancies.

4. Fly cadets

- Fly approximately 40,000 cadet orientation flights across the CAP fleet of powered and glider aircraft. Emphasis should be placed on getting new cadets members flown as soon after joining as possible.
 - Fly approximately 32,000 front and back seat powered cadet orientation flights.
 - Fly approximately 8,000 glider orientation flights.

5. Ensure processes and procedures are in place to support activation of Great Lakes Region assets in response to a large (multi state) disaster.

- Exercise each wing's ability to activate their alerting tools and determine wing resources available to deploy.
 - Conduct two Region-directed "short notice" activation exercises that assess each wing's ability to organize, account for and report on resources in response to a large disaster out of the wing.
- Exercise each wing's ability to activate their alerting tools and provide incident management team resources to deploy in response to a large (multi state) disaster.
 - Conduct two Region-directed activation exercises that assess each wing's ability to organize, activate and deploy resources in response to a large disaster out of the region.

- Region staff work with wing-level staff functions to prepare a multi-wing, Region-directed ES training event in FY17.

6. Sustain, develop, and continue to standardize core ES skills and abilities.

- Ensure that key aerial photography and aircraft search skill sets are routinely exercised to support requirements across DR, SAR and CD mission areas.
 - Ensure HQ GLR Ops/ES staff are present at wing-level operational evaluations.
 - Conduct two Region-directed "short notice" aerial photography exercises to support simulated government agency taskings.
 - Encourage and support the delivery of AP training workshops in three of six wings.
 - Provide HQ GLR presence at wing-level CD operational and training activities.
- Ensure that highly trained incident management teams are available to respond to wing, region, and National requirements.
 - HQ GLR identify and then fund formal training opportunities inside and outside CAP to provide Level II and Level I incident command training experiences for HQ GLR and subordinate wing personnel.
- Ensure operational effectiveness of VHF and HF radio network across Great Lakes Region.
 - Conduct a region-level communications exercise testing equipment readiness and operator messaging skills, potentially in tandem with a Region-wide activation exercise.
 - Conduct a Region-wide exercise involving HF and VHF equipment, including use of VHF repeaters and deployment of mobile HF equipment, to ensure equipment effectiveness and operator efficiency.

7. Provide opportunities for sharing of best practices and increasing proficiency in difficult to fill targeted operational specialties including Mission Information Officer, Planning Section Chief, Mission Safety Officer and Exercise Planner.

- Conduct a Great Lakes Region ES and Operations Conference.
 - Provide focused opportunities for the sharing of best practices
 - Conduct a Mission Information Officer training track.
 - Conduct a Planning Section Chief training track.
 - Conduct a Mission Safety Officer training track.
- Increase the ability of Great Lakes Region personnel to conduct high value exercises.
 - NO tasks for this objective

8. Enhance Incident Management Team (IMT) search management training and proficiency.

- Plan and Host AFRCC Inland SAR Planning Course (5-day) in 2017.
 - AFRCC National SAR School has committed to ILWG for 3Q17. We have proposed Bloomington, IL (KBMI)
- ILWG will conduct at least two IC Summits to provide a forum for development, standardization, and subject-matter updates.
 - 1st and 3rd Quarters.

9. The IL Wing ES Training Plan will include a minimum of two large-scale exercises managed by IL/DOS (to include Biennial Eval), five mid-scale missions managed by each Group, and four quarterly communications exercises managed by Groups.

- ILWG Ops/ES personnel will plan and facilitate the annual Wing-Level Exercise (Biennial USAF-Evaluated Exercise) in 2017, to include building-block table-tops and functional exercises.
 - NO tasks for this objective
- ILWG Groups 1, 2, 3, 4, and 22 will host a mid-scale SAREX to include a full IMT, a full Comm Unit, at least two aircraft, and at least two ground-teams.
 - NO tasks for this objective
- Four ILWG Groups will plan, host, and execute a CommEx to include at least one aircraft (airborne repeater, airborne VHF net) and multiple ground stations.
 - NO tasks for this objective

10. ILWG will continue to enhance and maintain communications capabilities, to include continued work with local, county, and state emergency response agencies.

- ILWG will continue liaison and joint-exercise activities with state agencies (IL National Guard, IL EMA, IL Emergency Services Management Agency, IL Law Enforcement Alarm System, etc.) and County EMAs.
 - NO tasks for this objective
